NEW Petition to Bucks County Commissioners

Petition summary and background	Because of Gov. Wolf's new mandate, a new voter-verified paper ballot system now must replace our current electronic system. Used with a risk-limiting audit prior to election certification, this will ensure that the accuracy of our elections can be proven. You will have a choice between getting a Voter <u>Hand-marked</u> Paper Ballot (VHMPB) system or a machine-marked paper ballot system known as a BMDs (ballot-marking devices)-for-All system.
Action petitioned for	We, the undersigned, urge you to act now to purchase a Voter Hand-marked paper ballot system, which is recommended by cybersecurity and election experts as the configuration that is the most secure, verifiably accurate, intuitive and accessible for all voters.
